

Billing With the Integration of Multiple Code Sets (MCS)

All codes submitted to Teleplan for MPS payment must be billed as an ICD-9 code. As such, a new 'code mapping' process has been established in MOIS to account for the use of Multiple Code Sets. When using alternate Code Systems, such as SNOMED-CT, for coding Health Issues, MOIS will automatically map your SNOMED-CT code to an ICD-9 equivalent for billing purposes. If a suitable mapping is not available, you will be prompted to select a new ICD-9 or MSP Diagnostic Code from the Universal Search Window (USW).

You will notice this 'swap' after billing an encounter. For example, when you are in the Day Book and hit 'Ctrl B':

> 16 18 R DE 3 10036 ... DUDLEY DO-GOOD ● 42234801 ... 16100 ... B

This will create a claim in your 'Unsent Claims' folder, which will display the new ICD-9 code that your original code has flipped to:

SERVICE:	Service Date:	2018.06.26	Location:	A
No. Service:	1.0000	Diag Code(s) 1:	42682 ●	...
Fee Item:	PG - 16100	2:		...
Unit Amount:	35.55	3:		...

For reference, you can view all the Code Mappings by going into Administration → Codeset Management → Codes. Select 'Find' to search for your code and you will see the Associated Mappings at the bottom of the page:

Associated Mappings							Add From	Add To	Delete
From	Code	From Term	To	Code	To Term	Active			
ICD-9	42682	LONG QT SYNDROME	...	SNOMED-CT	422348008	ANDERSEN TAWIL SYNDROME	...	<input checked="" type="checkbox"/>	
ICD-9	42682	LONG QT SYNDROME	...	SNOMED-CT	442917000	CONGENITAL LONG QT SYNDROME	...	<input checked="" type="checkbox"/>	
SNOMED-CT	111975006	PROLONGED QT INTERVAL	...	ICD-9	42682	LONG QT SYNDROME	...	<input checked="" type="checkbox"/>	
SNOMED-CT	422348008 ●	ANDERSEN TAWIL SYNDROME	...	ICD-9	42682	LONG QT SYNDROME	...	<input checked="" type="checkbox"/>	
SNOMED-CT	442917000	CONGENITAL LONG QT SYNDROME	...	ICD-9	42682	LONG QT SYNDROME	...	<input checked="" type="checkbox"/>
