

How to Run the Patient by Health Issue / Service

The Patient by Health Issue / Service report provides a list of patients with specified Health Issues and Service Code, sorted alphabetically by patient last name and totaled. This is useful for providing a list of patients that are eligible for complex care billing based on their Health Conditions and previous claims.

1. Go to the Report module
2. Under Clinical – Main
3. Select Patient by Health Issue / Service

The screenshot shows the MOIS - HALLIWELL MEDICAL CLINIC software interface. The window title is "MOIS - HALLIWELL MEDICAL CLINIC" and the desktop is for "HALLIWELL, A.". The interface includes a menu bar with "Record", "Modules", "Action", "Utilities", "Print", "Maintenance", and "Help". On the left, there is a "Reports" sidebar with a "Report List" folder and a list of modules: Patient Chart, Workspace, Scheduler, Billing, Administration, Data Exchange, and Reports. The main area displays a "Report List" table with the following items:

Report List	
+	Clinical - Audits
-	Clinical - Main
	Age/Sex Register
