This report can be used periodically throughout the year and can assist you in identifying those 'frequent flyers' who may not yet be identified as complex care patients.

This report lists patients alphabetically for the parameters selected (age range, visit date range, and number of visits greater/less than amount); Providers may be selected to be excluded; totaled.

Active patients in the specific age range who have made a selected number of visits within the selected date range are listed alphabetically.

The total number of patients reported on is listed on the final page of this report.

Patients List:	Default checked to provide active patients only.
Age Range:	Default 0 to 120 years
Appoint Date:	Narrow the date range between two desired dates. If no dates are mentioned, all appointments up to and including today will be pulled.
No.Visits:	Toggle between Greater Than or Less Than
Number:	Enter any whole number
Providers:	Select who to EXCLUDE from the report. E.g. You may wish to exclude After Hours or Emergency Room visits, etc.
CSV Output:	Check this box for the report to be directly sent to excel

Additional questions you can ask yourself as the provider, depending on this report outcome: Why are some patients coming in so frequently? Do we need to refer to other additional/ specialty services in town? Is there anything we can change with their care? (One example is if they are coming in for prescription refills every month... are you able to update their prescriptions for 3 months at a time instead).
