

## How to use Superfind

Superfind is available in the following areas of the Patient Chart

- Imaging
- Consults
- Procedures
- Interventions
- Reaction Risks
- Long Term Meds
- Prescriptions
- Social History
- Conditions
- Orders
- Facility Admissions

To use Superfind, navigate to one of the above folders in a patient chart. In the attached screenshots we will be in the patient's Health Conditions. From here press Shift + F9, or click Record in the tool bar and select Superfind.

The screenshot shows the MOIS - HALLIWELL MEDICAL CLINIC software interface. The main window displays a patient chart for DUDLEY DO-GOOD, 61 YR OLD, Chart 10036. The patient's name and DOB (1957.07.25) are visible. The interface includes a menu bar (Record, Modules, Views, Action, Utilities, Print, Maintenance, Help) and a toolbar with options like Record, Delete Record, Save, Undo, Refresh, Attachment, and Review. A context menu is open over the 'Record' button, showing options such as New (Ctrl+N), Delete (Shift+F2), Find (F9), Next (F8), Previous (F7), Superfind (Shift+F9), Superfind Next (Shift+F8), Superfind Previous (Shift+F7), Find First, Find Last, Save (F2), and Prompt (F4). A red arrow points to the 'Superfind' option in the menu. The main content area shows a table of health conditions with columns for Start, End, Problem Name, Rank, Certainty, Severity, S, and M. A condition with 'DM' is highlighted. Below the table is a 'Detail' section for the selected condition, showing 'Problem Name: DM', 'Severity System', and 'Severity Code'. The status bar at the bottom indicates 'Ready', 'Go To Chart...', 'Task Item: -', 'Msg Item: -', 'User: admin', 'Site ID: 2299', and 'v02.22.99 b190117'.

The find patient window will open. In the Search Parameters enter in the Code or Description you would like to search for. In the screenshot we have searched for all patient's with 'DM' listed in their Health Conditions.

The top portion of this window shows all patients that have DM listed in their Health Conditions
